DevOps  
Git

## EXPERIENCE

sep 2022 -oct 2023

Intern

- IT support at HouseLink agencies Nanyuki.
- Duties included configuring servers, ensuring all machines are up and running smoothly.
- Hardware management

2017-2021

writer and Freelancer

- self taught programming paired with coding.
- I got a rich experience in writing articles and academic writing as well since it has been one of my hobbies for the entire time i was schooling.

## PROJECTS

1. A web app

- I built a real Estate system. This system hosts many services together such as booking hotel/accomodation, shops space, events space for hire, buying/renting apartments, buying land/plots etc.
- This system fills the gap that has been existing with traditional ways of handling real estate services such as removing the need for pre-visits, customer security and saving time.

2. Morgage calculator App

- This application was among my learning practices in java which calculates morgage rates and duration.
